ABOUT THE WORKSHOP

Performing and interpreting coagulation assays is challenging due to the multiple pre-analytical, analytical and post-analytical variables involved. This unique, hands-on and interactive two days workshop conducted by experts with extensive experience in this field will deal with practical issues faced in routine practice.

Who is it for?

This course is aimed at providing exam going postgraduates and young practicing pathologists comprehensive hands-on training in investigating coagulation disorders.

How will this benefit?

This workshop will provide current information and practical tips on both performing and interpreting coagulation assays. Problem solving and troubleshooting algorithms will be discussed which will be relevant for establishing and updating routine practice.

Topics to be covered.

- Errors ,QC and coagulation screen
- Approach to deranged coagulation screen
- Platelet disorders
- Thrombophilia
- CWA, TEG
