

Pre Conference workshop

Bioinformatics for Molecular Pathologists- A hands on workshop!!

Dates: 25th to 27th Feb 2019

Venue:

Tata Memorial Centre

Advanced Centre for Treatment, Research and Education in Cancer

Workshop Description:

The workshop will be conducted by leading international molecular pathologists with expertise in clinical genomics. Topics covered by the workshop will include gene panel design and basics of unix. In addition, the participants will listen to didactic lectures and get hands on experience on processes involved in NGS data analysis such as quality checks, preprocessing, mapping, variant calling of indels, single nucleotide variants, copy number variants as well as their annotation, prioritization and reporting. We will also cover different open source programs with pitfalls of informatics and construction of clinical pipelines.

Who should attend?

The workshop is aimed towards molecular pathologists, haematopathologists & oncopathologists, oncology professionals and researchers working in the clinical genomics laboratory. Working in a molecular pathology laboratory is mandatory..

Workshop Faculty:

1. Steve Salipante, University of Washington, USA
2. Eric Duncavage, University of Washington at St Louis, USA
3. Keyur Patel, MD Anderson Cancer Research Center, USA
4. Rohan Kodgule, Tata Memorial Centre

Participation will be limited to 30 candidates on a first come basis.

Workshop Fees: Rs 15,000/-
