DELHI WELCOMES YOU

It is our great pleasure to invite you to the 11th Annual Conference of Molecular Pathology Association of India (MPAICON2024) at the All India Institute of Medical Sciences, New Delhi to be held on February 17th -18th 2024. We are honoured to be hosting this exciting event, which brings together leading experts, researchers, and practitioners from around the country to discuss the latest advances and trends in the field of molecular pathology.

Molecular pathology is an essential field of medicine that has revolutionized our understanding of disease diagnosis and treatment. By examining the genetic and molecular changes in tissues and cells, molecular pathology can provide precise and accurate diagnoses and enable the development of targeted and personalized treatments that can significantly improve patient outcomes.

The conference program is packed with informative sessions, engaging presentations, and thought-provoking discussions, all designed to enhance our understanding of the molecular basis of diseases and their diagnosis, prognosis, and treatment.

We are confident that this conference will not only provide a valuable learning experience, but also a platform for networking and building lasting relationships with your peers and colleagues. We encourage you to take advantage of this opportunity to connect, share your ideas, and learn from each other.
