The 2020 release of the WHO Classification of Soft Tissue and Bone tumors, 5th edition, contain several changes driven by new knowledge in the field. The CME will lay emphasis on the novel genetic alterations and their surrogate immuno-histochemical markers. The series of lectures will unravel the complexities in diagnosis and management of soft tissue tumors. The panel discussion will explore the current management strategies. The students will put their knowledge to test with thought provoking questions in the quiz session. Join us to learn the latest developments in the field.
