

Surgical Pathology begins with grossing. Correct grossing and adequate sampling is vital for diagnosis and contributes greatly to Staging of Cancer and provides the necessary prognostic and predictive information about the Tumour.

This CME aims at demonstrating the techniques of grossing Oncology Specimens along with the principles behind these techniques based on current evidence.

The topics cover a range of commonly encountered surgical specimens. Uniformity and standardization of Pathology reporting practices is the need of the hour.

The CME is being held under the auspices of the 'Teaching Pathologists' Conference (TPC)', Mumbai which is celebrating its 75th year of inception.

This CME aims at providing a comprehensive grossing guide to the post-graduate students and practicing surgical pathologists.

Chairperson

Dr. Nirmala A Jambhekar

Prof and Head
Department of Pathology
Tata Memorial Hospital

Organizing Secretaries:
